

Project 02 Guidelines

We will have 3 mini projects throughout the semester, 2 of which are mandatory while the third will be a bonus.

Any Plagiarism Detected will lead to an immediate ZERO in the project.

Requirements:

- Students should work in a group 3 - 4 max. You don't have to stay with the same group for the whole semester.
- Only One member should submit.
- Please submit your project report as a single PDF file + your code as a single .zip/.rar file.
- You can write code in any language you want, as long as we can compile and run it easily on VS code.
- USE of external library is NOT accepted, code your own methods.
- Late submissions will NOT be accepted.
- Discussion will be held during the allotted time.
- Project Report must include:
 - Project Title
 - Team Members' Names and IDs
 - Detailed Description of what your project does (1 - 2 paragraphs).
 - What does it do?
 - Input Format
 - Output Format
 - Inside Mechanism
 - Programming Language, Tools & Libraries used.
 - Images of your project with the output

Project 02 Ideas

- CFG Parser
Takes CFG and a string as input and outputs a parse tree and derivation of the string
- CFG to PDA Converter
Takes a CFG and converts it to a PDA
- Turing Machine Simulator
Takes a TM and simulates a test string on the tape
- Parser for Arabic Language
Takes Arabic sentence and validates the syntax by generating a parse tree. (You must define the CFG with no less than 10 productions)
